8 Marina View, Asia Square Tower 1
Singapore 018960

Dear Hiring Professional,

I am writing to express my strong interest in the Campus M1/M2 Quantitative Researcher (Intern). My background in engineering has provided me with a solid foundation in mathematics and programming. Additionally, I hold degrees in both engineering and accounting, which I believe will be invaluable for conducting financial analysis.

I have always been drawn to creative and challenging roles, but it wasn't until I discovered the world of quantitative trading that I found my true passion. I have been actively involved in trading for several years, achieving stable gains over time. Notably, during the U.S. banking crisis, I experienced significant gains and losses. While I initially doubled my initial investment within the first few days, I later faced substantial losses. This rollercoaster experience not only deepened my passion for trading but also imparted valuable lessons. It was a defining moment that solidified my determination to pursue a career as a quantitative trading field.

My ability to excel under high pressure and manage time effectively is exemplified by my simultaneous pursuit of two master's degrees at NUS and SMU. Although my master's GPA may not be the highest, I consistently outperformed many classmates who had more extensive experience in accounting. Furthermore, my bachelor's GPA was the highest in my class.

I want to emphasize that I possess both the foundation and the capability to excel in the role of a quantitative trader. This position aligns perfectly with my aspirations, and I am eager to contribute my skills and knowledge to your team. I kindly request your consideration of my application.

Thank you for your time and consideration.

Yours sincerely,
Shiping Guo
